## Driver QR E-Business Card

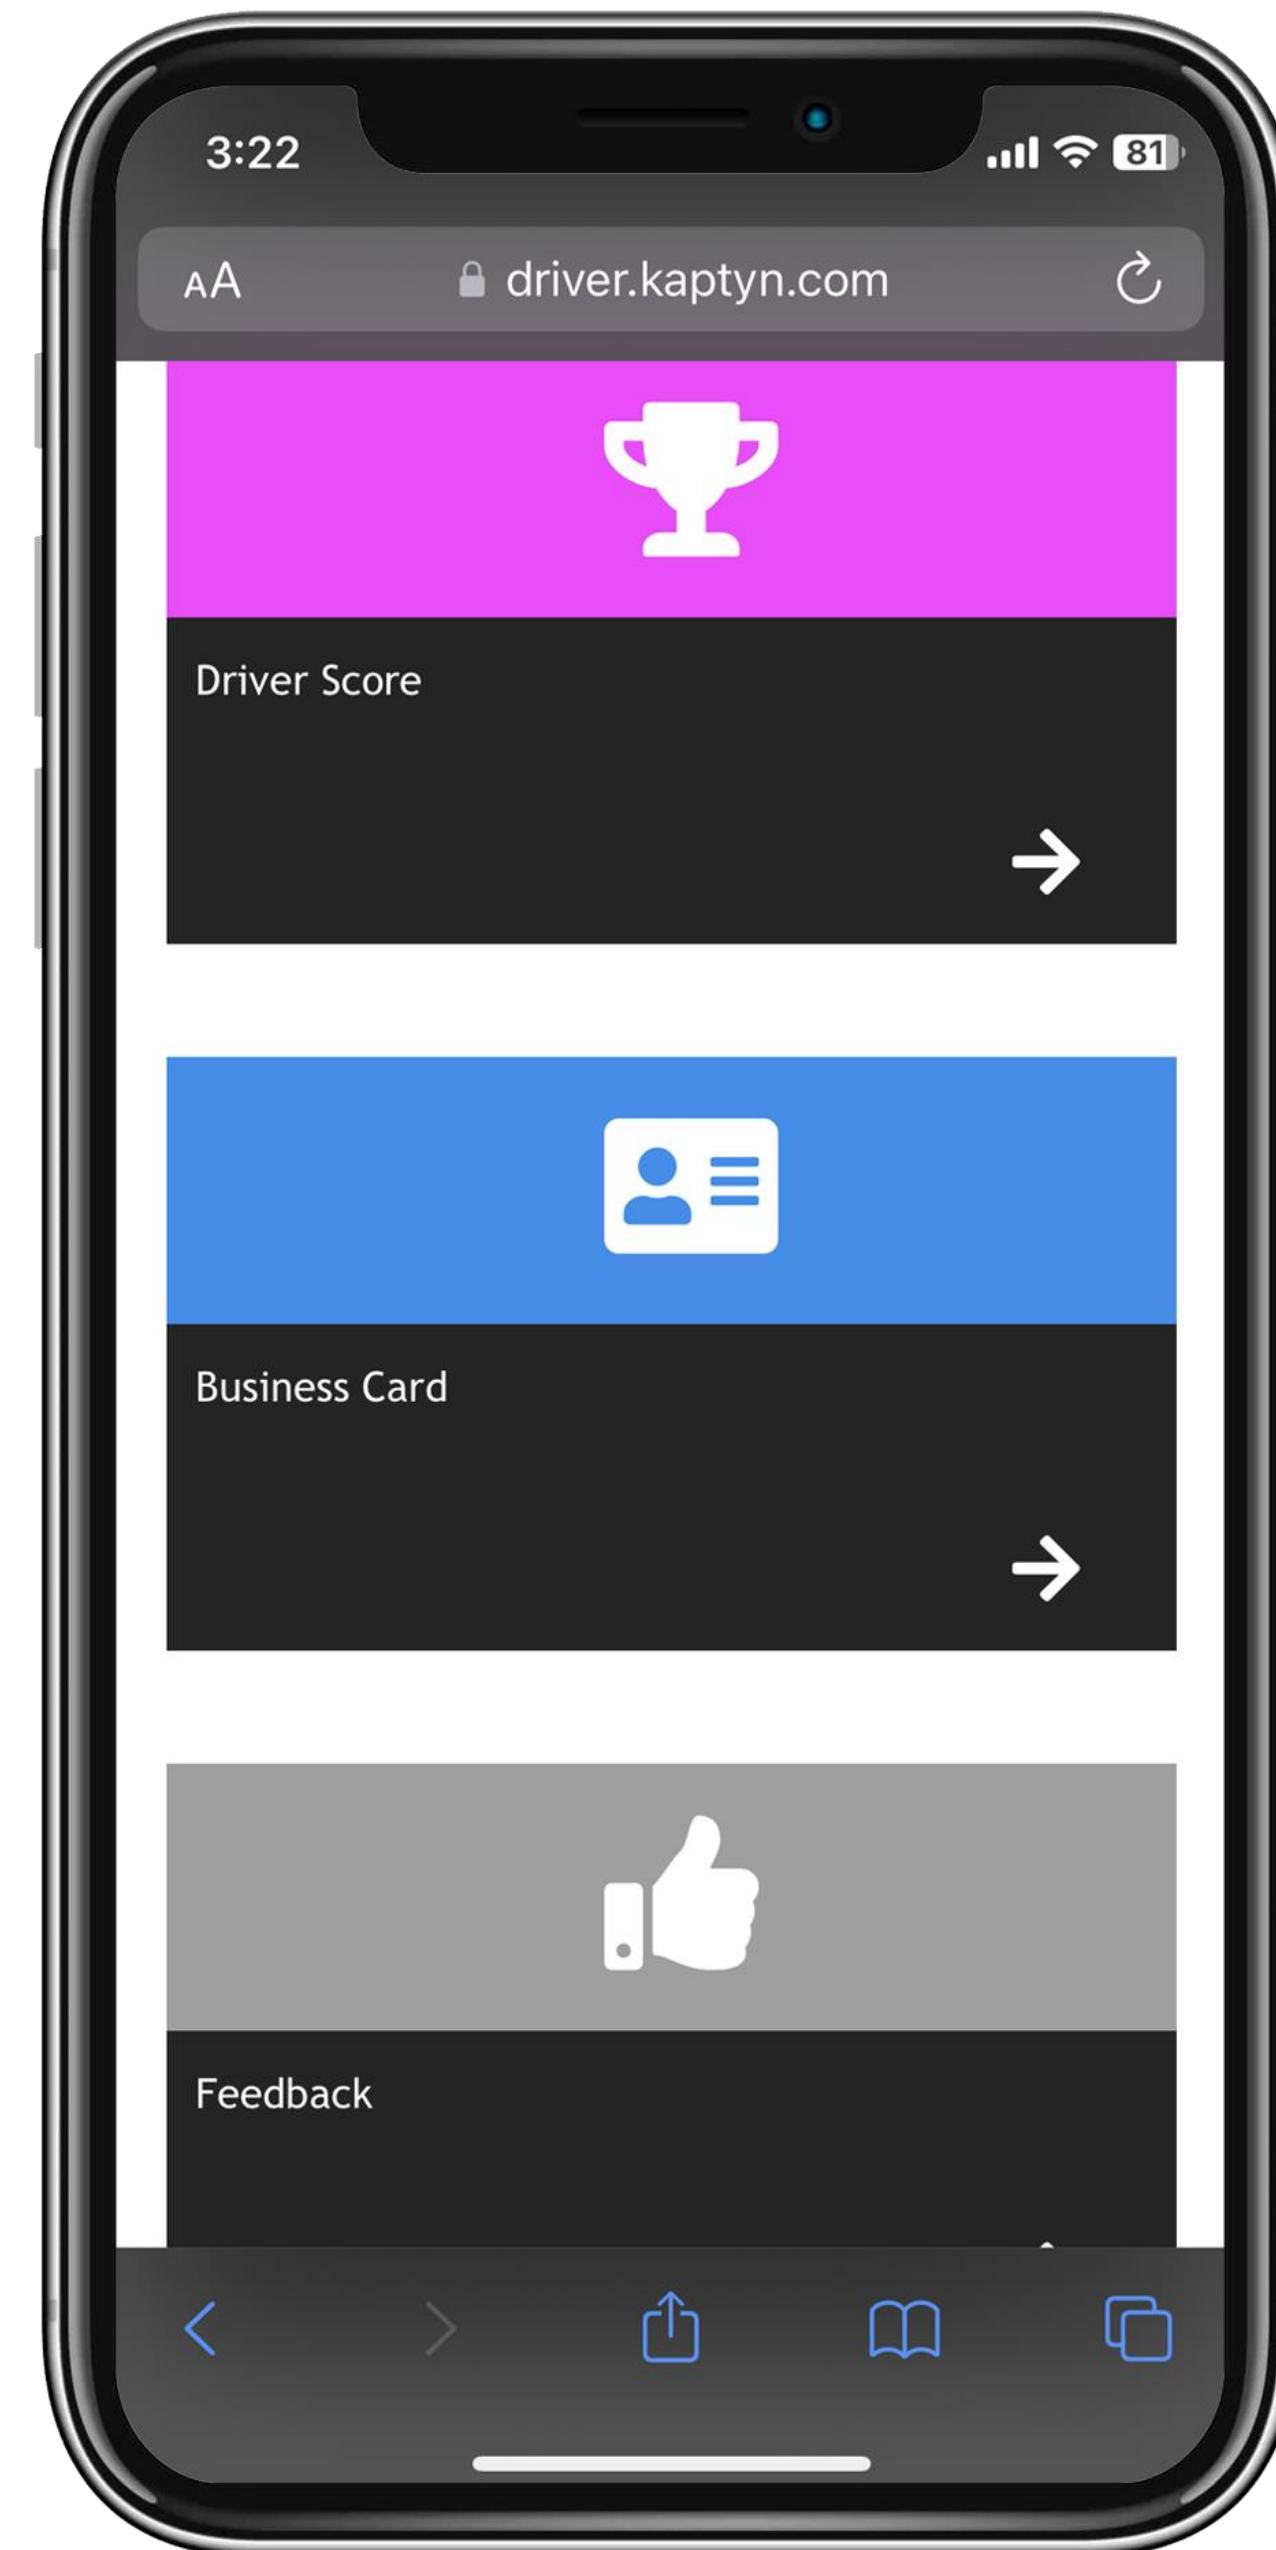

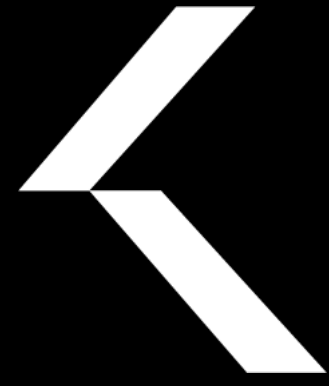

## Your Personal E-Business Card

Log into your Driver portal by navigating to  
<https://driver.kaptyn.com>

Login using your company issued email address.  
Normally: `firstname.lastname@kdriver.io`

From the home screen of your driver portal, scroll  
down and select the blue tile labeled Business Card

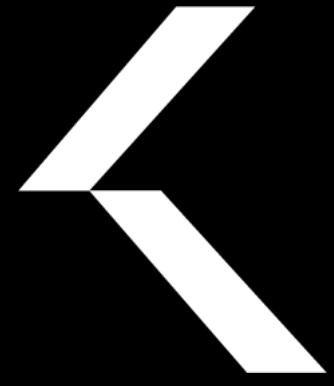

## Scan QR Code

Show this QR Code screen to the passenger

This will allow them to Bookmark your personal driver e-business card on their preferred mobile web browser

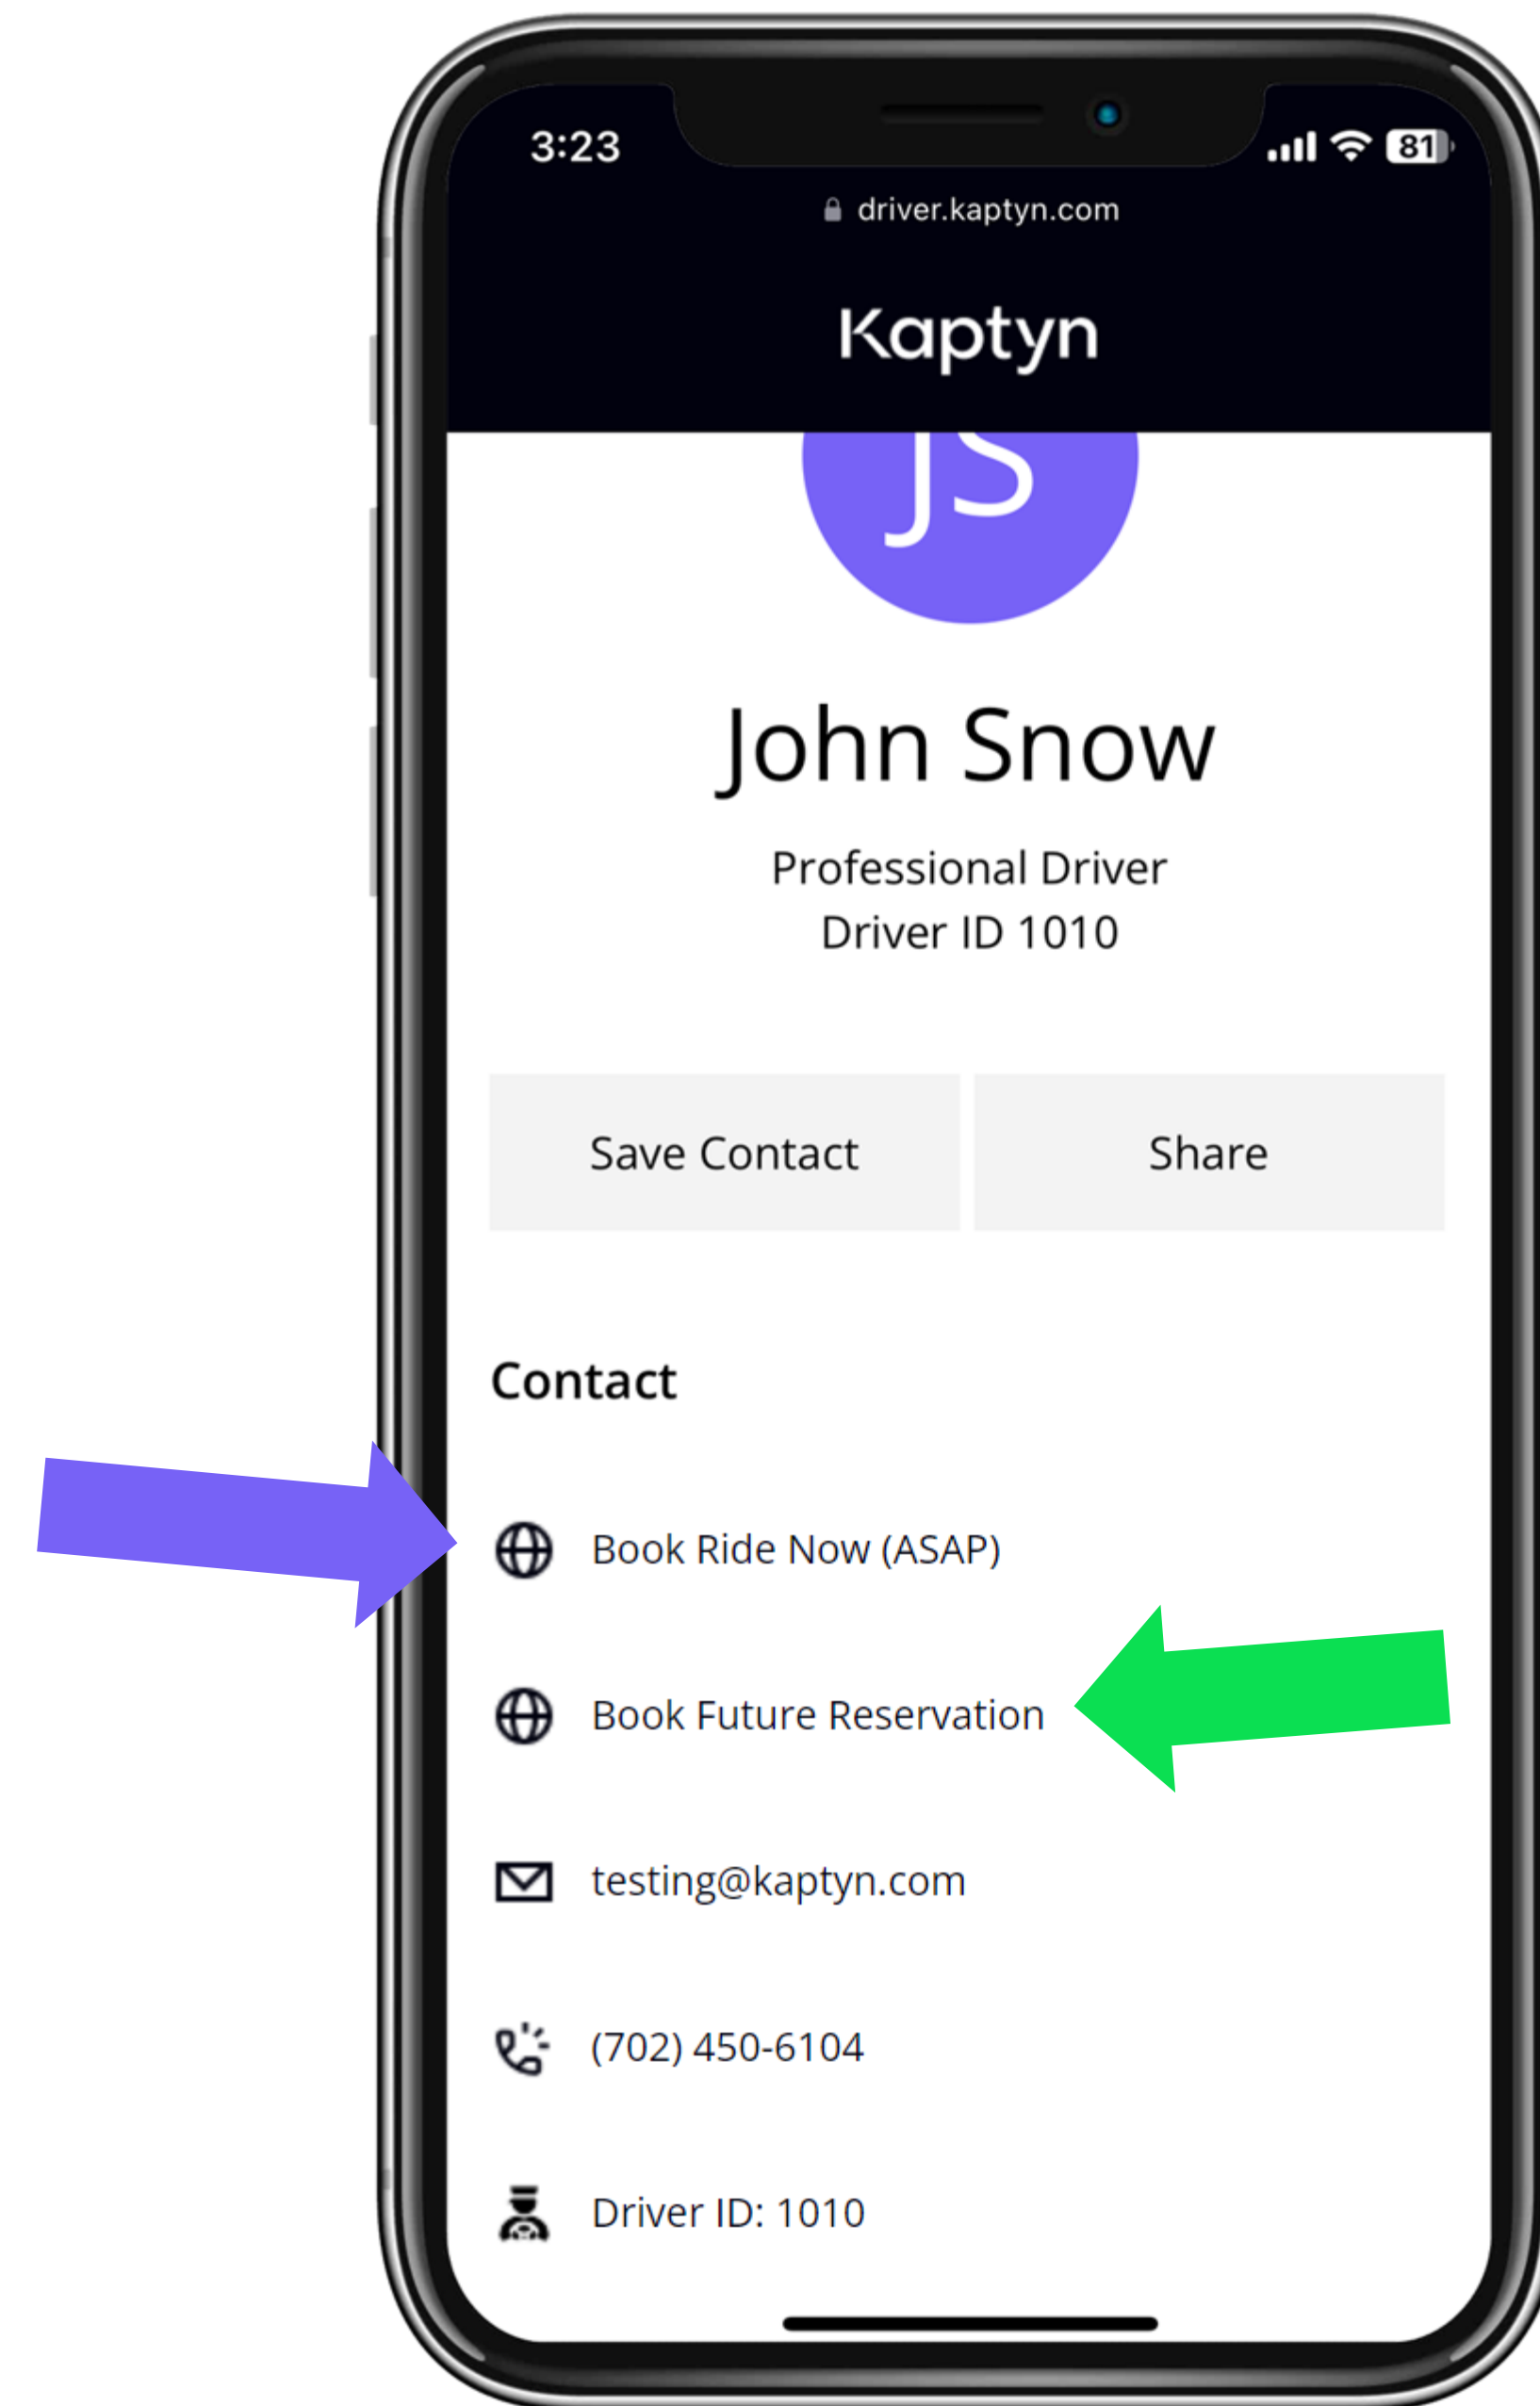

## Booking ASAP Rides

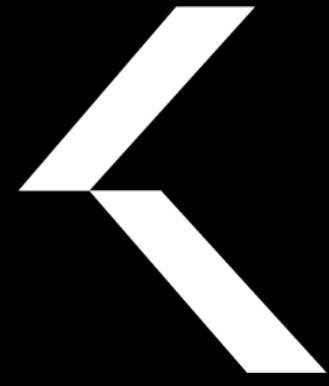

Review with the passenger the 2 booking options they will see.

Use the [Book Ride Now \(ASAP\)](#) when they are ready to travel now. This will allow them to see real time inventory / availability when booking for an immediate need ride.

Use the [Book Future Reservation](#) link when needing to book an advanced reservation, 2 hours or more out.

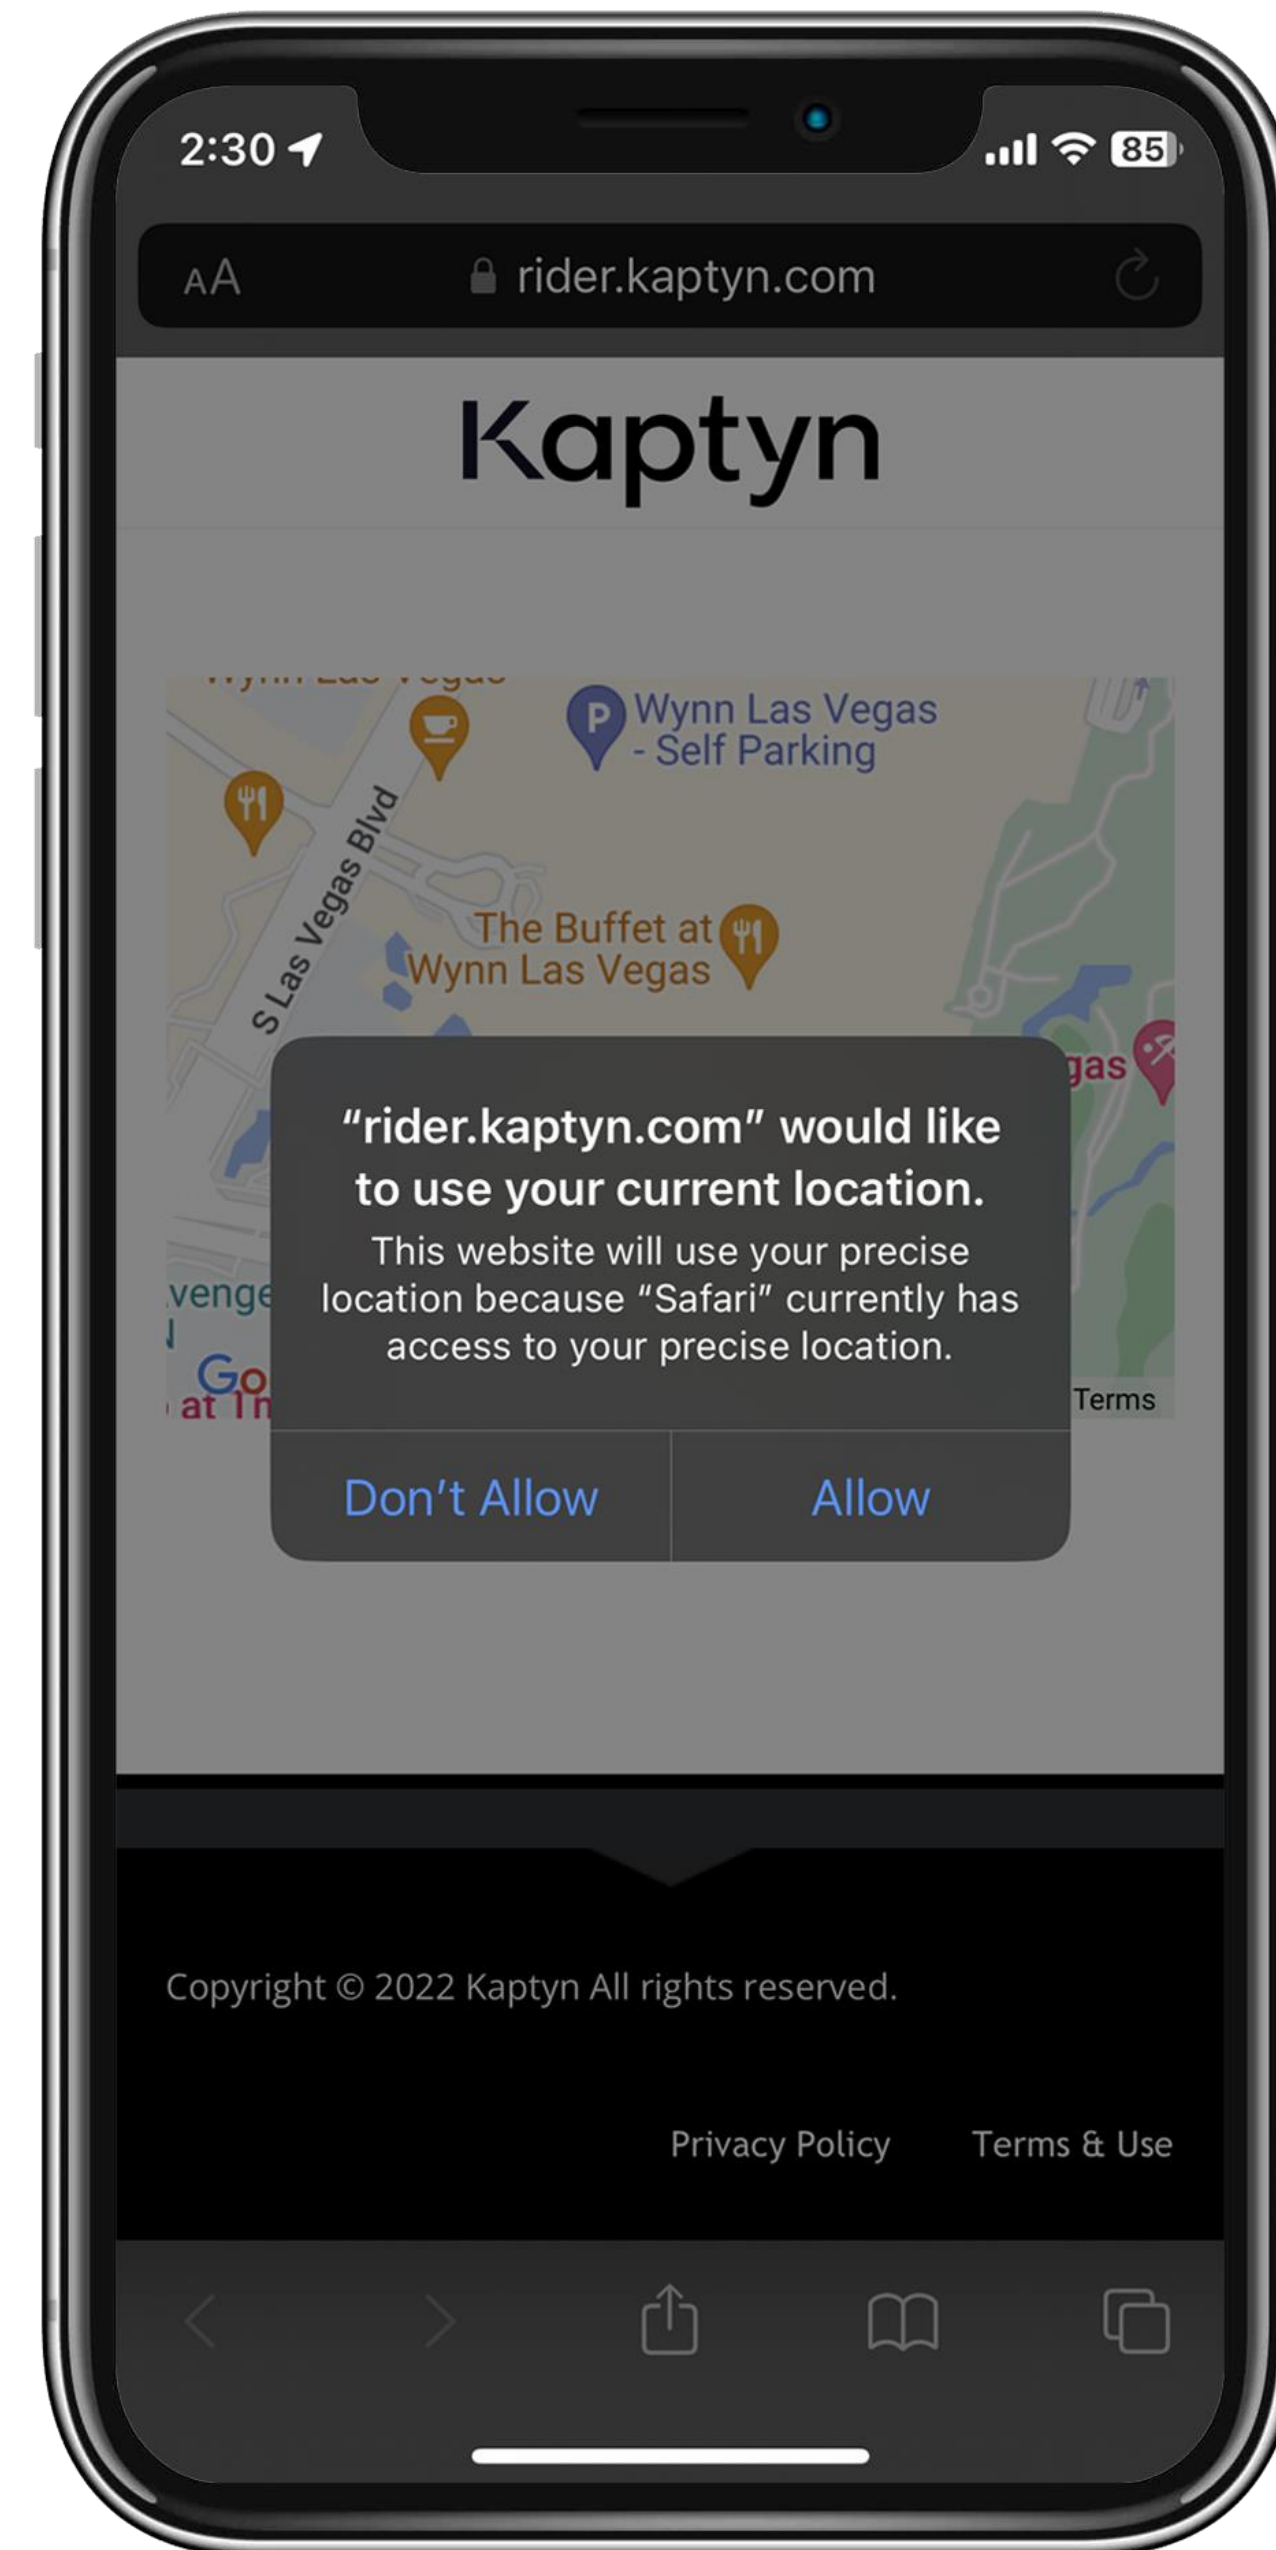

This will not only credit your driver account but set you as the requested driver in case you are free and on the road at the time the passenger books.

## Allowing Location Services

Remind the passenger that the booking link will request their current location and to share their location with the website in order to start the booking process.
